Activities and Conversation

Our teachers of Turkish do many speaking activities with the students and take part in our students' cultural integration, studying with Turkish students in the Arabic language courses at our establishment; thus, the teachers provide language learning for the students within the original environment of the language, via activities out of the classroom.

Lessons in our center are held by a young, active and practical teaching team through a student-centered approach, aiming to make the students use the language interactively.

Turkish Language Exam Held by Ministry of National Education

After passing the final exams at the end of courses, a certificate of completion and achievement is given to our students. Then after finishing the sixth level, our students can -if they would like to- take the Turkish language exam held by the Ministry of National Education during the period of granting formal certifications.

The Advantages of Learning Turkish at Akdemistanbul

The most advantageous characteristic of learning Turkish at **Akdemistanbul** is that the lessons depend on many practices and activities, far from drowning students in linguistics; because the teachers give the students the required amount of grammar only. Then, they convey the grammatical templates to the students by many example, including sentences and dialogues. Thus, a practical application is used for every subject in the classroom. Teachers also urge our students to compose sentences and present them with different subjects through dialogue texts.

Moreover, the lessons of our course curriculum contain subjects about basic grammar, composition, dictation, listening, conversation, text reading and comprehension. In addition, these lessons pay attention to presenting the students with the four language skills at equal and synchronous levels.

Placement Test

Those who would like to learn Turkish language take a placement test prepared by our establishment. Then, their levels get determined via an oral test held after the writing test.
